- Shugo Volcano is a remarkable natural landmark located 5 km southeast of Varenikovskaya village in the Krymsk District, 43 km from Anapa. It stands as the highest point of the Dzhiginsko-Varenikovskaya ridge, reaching 163 meters above sea level. This ridge is the eastern extension of the Taman Uplands, spanning 25 km and featuring four volcanoes. The volcano's crater forms a large bowl, with the bottom sitting 4–6 meters lower than the upper edges of the crater rim. The bowl has a diameter of about 450 meters.
- Based on comprehensive physical and chemical studies, the mud of Shugo has been discovered to be effective in treating a wide range of disorders. This dark gray mud with a bluish hue is saline and oily, rich in iodine and bromine. Residents of the region think that Shugo mud has healing effects.
- In the Varenikovsky rural settlement of Krymsk District, within Shkolny farm, there is a natural water source called Shchelokov spring. The area surrounding the spring is being looked after, there is a fountain nearby. Shchelokov spring is a popular spot not only for the local residents but also for people from other parts of the region, who come there every year to celebrate a traditional Christian holiday, Epiphany.

Shugo Mud-volcano

Shugo Volcano is a remarkable natural landmark located 5 km southeast of Varenikovskaya village in the Krymsk District, 43 km from Anapa. It stands as the highest point of the Dzhiginsko-Varenikovskaya ridge, reaching 163 meters above sea level. This ridge is the eastern extension of the Taman Uplands, spanning 25 km and featuring four volcanoes. The volcano's crater forms a large bowl, with the bottom sitting 4–6 meters lower than the upper edges of the crater rim. The diameter of the bowl is about 450 m.

Based on comprehensive physical and chemical studies, the mud of Shugo has been discovered to be effective in treating a wide range of disorders. This dark gray mud with a bluish hue is saline and oily, rich in iodine and bromine. Residents of the region think that Shugo mud has healing effects.

Shchelokov water spring

In the Varenikovsky rural settlement of Krymsk District, within Shkolny farm, there is a natural water source called Shchelokov spring.

The area surrounding the spring is being looked after, there is a fountain nearby. Shchelokov spring is a popular spot not only for the local residents but also for people from other parts of the region, who come there every year to celebrate a traditional Christian holiday, Epiphany.

Krymsk Local History Museum

The Krymsk Local History Museum was founded in 1964 by the Krymsk City Executive Committee on January 16, 1964. Located in one of the city's oldest buildings, built in the late 19th century, the museum was originally a Greek school. It has a significant number of historical documents illustrating the city's history across different events, providing insights into the nation's past. The museum particularly emphasized research activities and gathering materials linked to the period of the Great Patriotic War (1941–1945).

A specific area of the museum focuses on the events of the Great Patriotic War. The central part of the Blue Line, which served as the enemy's defensive line and was the last and most important fortification of the Nazis in the Caucasus, was located in Krymsk District.

Competitive advantages

Geographical location

- > Krymsky district is located in the southwestern part of the Krasnodar Territory
- > Krymsky district borders seven districts
- > The territory of Krymsk District is part of the third building-climatic and second agro-climatic districts, located in the foothill zone of the North Caucasus
- > Krymsk District serves as an important transportation hub, with both the Krasnodar – Novorossiysk and Krasnodar – Anapa highways running through its territory
- > Krymsk District is located on the way to the seaports of Novorossiysk and Port Kavkaz

Mineral and raw material resources

- > Most of Krymsk District's territory is made up of agricultural lands, which serve as the primary source of raw material wealth and have strategic significance
- > Oil and construction materials deposits have been explored on the territory of the district
- > Many water sources can be used for balneological purposes

Environmental and climatic conditions

- > Krymsky district is an area with a temperate climate
- > The district covers an area of 160,125 thousand hectares. It spans approximately 50 kilometers from north to south and over 60 kilometers from west to east.
- > The relief in the area is characterized by gentle hills, crisscrossed by rivers. The main rivers in the district are Psebeps, Psif, Kudako, and Adagum.
- > The area has moderately challenging natural and climatic conditions Buildings and structures with normal and advanced level of responsibility (6 points), with a high level of responsibility (7 points)
- > Topsoil characteristics and scores: organic matter content — 53; organic matter in the soil depth profile — 73; overall soil quality index — 64

Demographic factors

- > The population is 130,802 people, with 35% being part of the workforce
- > Krymsk District is highly diverse in terms of its population, with over 67 nationalities residing there, the majority being Russians
- > Krymsk District has a positive migration balance
- > The registered unemployment rate (for the municipality as a whole) amounted to 0.2%

Business support Infrastructure

- > The Krymsky District Municipal Entrepreneurship Support Center provides consulting services to small and medium-sized businesses and self-employed individuals
- > The Krymsky District Municipal Entrepreneurship Support Center offers a co-working space for small and medium-sized businesses as well as self-employed individuals

Economic development

- The economy of Krymsk District has a diverse specialization across multiple sectors, with a strong focus on industrial production
- The city of Krymsk is a key railway station in the North Caucasus Railway system. The main Krasnodar – Novorossiysk railway, along with branch lines to Timashevsk and Port-Kavkaz, runs through the city. The Krymsk railway terminal can handle all types of cargo transported by rail
- Over 4,500 entities from various economic sectors, such as businesses, associations, branches, separate units, and individual entrepreneurs (without forming a legal entity), are registered within the district
- The district economy is based on industry, construction, trade and transportation
- More than 2,000 private farms are registered in the district, focusing primarily on growing potatoes and other vegetables, as well as producing livestock products such as dairy and meat from cattle, pig breeding, poultry farming, and sheep breeding

Success stories

Construction of a battery manufacturing plant, OOO AB-BATTERIES

Investor
OOO AB-
BATTERIES

Implementation
timeline:
2024

Volume of
investments:
1 billion
rubles

Number of new
jobs:
150

The investment project aims to focus on import substitution. It is expected to create 150 new jobs across various sectors such as warehouse, office, production, and logistics. This increase in employment will, in turn, boost the revenue for the budget of Krymsk District.

The project agreement was signed by V.I. Kondratyev, Governor of the Krasnodar Territory, at the international industrial exhibition Innoprom-2022 in Yekaterinburg.

The investor has been allocated a land plot of 10 hectares in the Adagumsk rural settlement of Krymsk District to accommodate the production.

So far, the design for the initial phase of construction, comprising a warehouse building and a checkpoint, has been finished. Work on

designing the production complex has started. Construction equipment has been bought, and technical requirements for water, gas, electricity, and communication networks have been met. The investor has secured a construction permit for the first phase. In 2024, it is planned to launch the production of batteries in the Crimean region.

All success stories

The second phase of building the plant for manufacturing elevator equipment

	Investor OOO KAHMAN		Implementation timeline: 2023
	Volume of investments: 298,4 mln rubles		Number of new jobs: 100

An investment project to build the only elevator equipment manufacturing plant in the Southern Federal District of Russia. In 2020, a protocol of intentions was signed for investment in constructing a plant to produce elevator equipment. The project involves establishing a production and technical facility to manufacture advanced elevators, capable of producing up to 5,000 elevator sets annually. The investor is the winner of the regional quality competition Made in Kuban.
